Mobile Launch System

The mobile launchpad will provide decentralized projects with a platform to raise and exchange capital. To provide investors with the opportunity to participate in a safe and harmonious environment with Guaranteed Allocations and First Come First Service (FCFS) Pools.

It provides coin control on both mobile phones and computers. Thanks to other networks, he can start many different projects.

Multiple Blockchain Network supporting Launchpad for Crypto projects to be launched on Binance Smart Chain, Ethereum, Solana, Polygon, Avax, KCC and tron.

Multi-Blockchain Launchpad

Mobile Launchpad outperforms its competitors by far.

Supporting Crypto Launches on Multiple Networks, Mobile Launchpad has a huge scope of success. "

It aims to bring blockchain to all people by supporting different networks and influencing the entire ecosystem.

Crypto Launchpad Industry

We believe that in order to grow, the crypto launchpad industry should focus on selecting quality crypto projects.

In this way, we can bring blockchain technology to more people, lead the development and bring innovations to the fore.

THE PROBLEM

- ✓ Challenges of using multiple platforms for different blockchain network.
- ✓ High network gas fees
- ✓ Reliability and Authentication of upcoming Crypto project
- ✓ Currently the crypto community has limited investment
- ✓ Crypto project unable to reach desired audience

Solution (Our Vision)

Mobile Launch plans to develop blockchain technology by implementing many projects in the crypto field. In this way, blockchain will increase its relationship with more people and will be beneficial to the entire industry. Thanks to people's use of blockchain technology, governments will issue their own digital currencies. In this way, we will ensure the spread of blockchain technology all over the world. We are leading this and raising funds for many projects and will further expand the market by assisting with the marketing strategy.

Supported Projects

Innovative and Usable Application

It is a simple but functional incentive platform where you can follow the coins extensively on the mobile application and earn rewards thanks to the staking feature.

MobileLaunch creates highly distributed launches, you can choose between a lottery level or the general round, and if you win the lottery you will receive a guaranteed allocation on the first round (Allocation round). The distinguishing feature of MobileLaunch is a two-tier system that guarantees an allocation at each tier level. There are no first-come, first-served Round 1s or boats; only fairly distributed rewards for all participants.
